

Next-Generation Supermicrosurgery Consortium

18th Virtual Conference The Future of Surgery

TUE, Sep 17, 2024, 18:00 - 20:00 (JST)

The Next-Generation Super microsurgery Consortium, chaired by Dr. Isao Koshima, Professor of Plastic Surgery at Hiroshima University Hospital, aims to advance and promote the Next-Generation Super microsurgery in both medical and industrial fields. The organization aims to promote the development and spread of Next-Generation Super microsurgery in both medical and industrial fields.

In addition, researchers in medical technology and industry have gathered to promote the industrialization and practical application of related technologies.

As part of this effort, we hold monthly online lectures.

1. Opening speech

The latest insights on super microsurgery **18**

Isao Koshima, MD, PhD

Professor and Center Chief,
Department of Plastic and Reconstructive Surgery,
International Center for Lymphedema,
Hiroshima University Hospital

2. Invited Lecture

Plastic Surgeon's Journey from Scratch in Industry

- Academia-Government Collaboration: From Medical Device Development and Regenerative Medicine Business to Startup Founding and Exit -

Yusuke Shimizu, M.D., Ph.D.

Chief Professor
Department of Plastic and Reconstructive Surgery,
Faculty of Medicine, University of the Ryukyus

3. Q&A, Panel Discussion

Panelist: Prof. Koshima, Prof. Shimizu, Prof. Sachin from India.

We may also have additional special guests participating. Please look forward to it!

■ Registration and Fees : <https://cpk.jp/reg/2>

Participation fees for organizations such as companies and public institutions are as follows:
15,000 yen per person, 28,000 yen for two people, and 40,000 yen for three people.

*Special discount tickets for 6 or 12 sessions are also available.

*Free for healthcare professionals, academia, and students (excluding adult students).

Registration

Next-Generation Supermicrosurgery Consortium

18th Virtual Conference | The Future of Surgery

Outline

The 18th Online Lecture on the Future of Surgery will feature a special lecture by Chief Professor Yusuke Shimizu M.D. Ph.D. of the department of Plastic Surgery, Graduate School of Medicine, University of the Ryukyus.

Prof. Yusuke Shimizu has been involved in medical device development since 2012. In 2017, he began selling the Kopligh (a plastic retractor with LED lighting) and has since been involved in regenerative medicine, promoting industry-academia-government collaboration, and eventually founding a venture company originating from Faculty of Medicine, University of the Ryukyus. As both a physician and an entrepreneur, Dr. Shimizu will share his experiences on how he managed the company, achieved profitability, and navigated the challenges of business development while sharing his vision of an ideal leader.

President Isao Koshima (Professor of the department of Plastic and Reconstructive Surgery at Hiroshima University Hospital) of this research society will present the latest findings and global trends related to the invited lecture.

After the lecture, there will be a lively online panel discussion with the speakers.

We hope you will join us for this informative event!

Supplementary Information [Career & Achievements]

Yusuke Shimizu, M.D., Ph.D.

Chief Professor
Department of Plastic and Reconstructive Surgery,
Ryuky University

March 1998: Graduated from Keio University School of Medicine

April 1998: Resident in the Department of Plastic and Reconstructive Surgery, Keio University School of Medicine

January 2000: Resident in the Department of Head and Neck Oncology, Tochigi Cancer Center

July 2004: Research Associate in the Department of Plastic and Reconstructive Surgery, Keio University School of Medicine

May 2006: Staff in the Department of Plastic and Reconstructive Surgery, Japanese Red Cross Shizuoka Hospital

March 2010: Completed the Graduate School of Medicine, Keio University

May 2010: Assistant Professor in the Department of Plastic and Reconstructive Surgery, Keio University School of Medicine

April 2013: Senior Lecturer in the Department of Plastic and Reconstructive Surgery, Keio University School of Medicine

August 2014: Associate Professor in the Department of Plastic and Reconstructive Surgery, Keio University School of Medicine

February 2015: Specially Appointed Professor in the Department of Plastic and Reconstructive Surgery, University of the Ryukyus Hospital

April 2018: Professor in the Department of Plastic and Reconstructive Surgery, Graduate School of Medicine, University of the Ryukyus etc.

<Qualifications>

- Director of the Japan Society for Innovative Techniques in Plastic Surgery.
- Councilor of the Japan Society of Aesthetic Plastic Surgery (JSAPS)
- Member of the Scientific Committee of the Japan Society of Plastic and Reconstructive Surgery
- Delegate of the Japan Society of Cranio-Maxillofacial Surgery
- Scientific Advisor for Grancell Co., Ltd. (<https://grancell.co.jp/>) etc.
